User Acceptance Testing Report

ServiceNow Incident Lifecycle Automation

Prepared example — test execution results must be updated after actual UAT.

1. Report Information

Field	Details
Project	ServiceNow Incident Lifecycle Automation
Report version	1.0
Report date	24 October 2026
UAT period	To be scheduled
UAT environment	ServiceNow development/test instance — confirm instance
UAT lead	Project team — to be assigned
Prepared by	Project team
Related document	Functional Specification Document (FSD)

2. Executive Summary

Planned UAT covers incident creation, priority calculation, auto-assignment, state validation, SLA alerts, resolution, notifications, and related Knowledge/Change workflows. Execution has not been confirmed; therefore no pass rate or acceptance decision is claimed. Recommendation: complete UAT, record evidence, resolve critical/high defects, and obtain business-owner sign-off.

3. Test Summary

Area	Planned coverage	Status	Evidence / notes
Incident creation and mandatory fields	UAT-01, UAT-02	Not executed	Capture incident number and screenshots during execution
Hold and resolution validation	UAT-03, UAT-04	Not executed	Verify hold reason, resolution code and notes
Auto-close and reopen	UAT-05, UAT-06	Not executed	Record actual result and timestamps
SLA warning and breach	UAT-07	Not executed	Capture notification and escalation evidence
Knowledge and Change integration	Relevant integration scenarios	Not executed	Run only if configured in the target instance

4. Defects and Risks

No actual defects are reported in this prepared example. Log each defect with ID, severity, steps to reproduce, expected result, actual result, owner, and retest status when UAT is executed.

5. Acceptance Decision

Decision	Status
Accept / Accept with conditions / Reject	Pending actual UAT execution
Business owner	To be assigned
Approval date	
Comments	Complete after test evidence and defect review
